RE: SARS - CAUSE AND CURE

While researching SARS related information on the internet this afternoon (Sunday 6th July) I happened upon the web site - www.hwfb.gov.hk/en/press/press030612b.htm, wherein the SARS Expert Committee is inviting written submissions from the public to provide information on issues relating to the areas under review.

Although I see the deadline was June 30th, I would like to contribute information which I believe is very important to the health and well being of the Chinese people as well as populations in neighbouring countries.

I am a medical medium and homoeopathic practitioner. Daily I provide diagnosis and treatment protocols for people in many parts of the world by simply having their name, date of birth and location. I source information from the Universal Mind which is not bound by time and space where knowledge, wisdom, truth and understanding is accessible without limitation. This may sound unbelievable, but it is true. Much has been written about [Redacted], America's 'greatest seer' who had the same ability while in a trance state. But unlike [Redacted], I do not need to be in a trance state to receive this information. I do not publicise my work and try hard to live a quiet, peaceful life.

However, when the world was confronted with a new disease - Sudden Acute

Respiratory Syndrome, which was initially headlined as "Worse than AIDS", I sourced information on SARS and also formulated a homoeopathic cure and vaccine. I made contact via email with hospitals and universities in areas that were most adversely affected and passed on this information (copy attached), but did not receive a solitary response

There were probably several reasons for this. Firstly, I volunteered to be used a human guinea pig to test my vaccine. Given the extent of hospital and government quarantine operations being undertaken to prevent infection, I must have been considered quite mad. Secondly, I was not obviously part of a major pharmaceutical company or medical research team so "how could I possibly have come up with cure and vaccine in such a short time?", and thirdly - homoeopathy is not generally accepted by mainstream medicine, despite the volumes of documented evidence which indisputably attest to the amazing curative powers of homoeopathic remedies.

While you will no doubt view the above with scepticism, I recommend that you consider the words of Albert Einstein who was one of the world's greatest scientists and a great lateral thinker. He said "*The most beautiful and most profound emotion one can experience is the source of the mystical. It is the source of all true science. I have not arrived at my understanding of the universe by means of the rational mind*".

While the rational mind provides us with clear thinking, which is essential in problem-solving and crucial in negotiating the problems of the world; it has its limitations. *There is a world that the rational mind cannot penetrate.* Some people hold the view that they can only believe in things they can touch, hear and see. Yet science itself estimates that there is less than one billionth of our reality that can be recognised by our physical senses. Our physical senses register only a narrow bandwidth of physical reality.

Many fail to understand that the world is an immense field of energy and that the human body is made up of a giant collection of energy particles that are in a constant state of recreation. From the quantum view looking beyond the atomic particles you perceive a giant energy grid from which all matter is being created. This energy grid is not just confined to our bodies, it is a vast flowing energy web that reaches into every fabric of the universe. Physicists have confirmed that energy seems to arise out of the very 'nothingness' of space. From this field, particles of matter seem to come into existence only to eventually 'decay' back into the field. This vast energy field has been known to indigenous cultures and eastern mystics for thousands of years.

Once you KNOW that you are part of this grid, you will feel a link to everything around you. You will begin to act more on instinct than by working everything out with your rational mind. The vast grid of energy that creates matter is, in itself alive. It has, for want of a better word, an intelligence or knowing. When you align yourself with this knowing, you begin to understand automatically things about people, places and the universe. You begin to feel directed to move along certain pathways.

As there have been no confirmed cases of SARS in Australia, I am unable to test my

cure and vaccine. The Commonwealth Scientific Institute and Research Organisation [CSIRO] did import some of the SARS virus under strict quarantine, but it only to be used for research into the most effective rapid testing for suspected cases of infection, but not for the development of a cure or vaccine.

Nevertheless SARS is only 1 disease. The world is plagued by so many diseases- acute and chronic AIDS, Alzheimers, Asthma, Cancer, Diabetes etc.. etc. I have learned that nothing is incurable, for as long as 2 or more vital organs are functioning at no less than 35% of their functional capacity. There are cures.

I could simply continue consulting with patients one by one, but I feel it is time to expand my horizons and work with a group who has the ability to comprehend and test my knowledge and prove its reality.

Furthermore, I am plagued by the feeling that we have not heard the last of SARS . I believe that it will very likely return with a vengeance during China's next winter and I therefore feel compelled to explore new avenues for getting my cure and vaccine tested so that it can be commercialised in time to provide people most likely to be affected with a safe vaccine. In this regard I quote [REDACTED] the Guangdong Institute of Respiratory " *Nobody can tell whether there is going to be another large scale SARS outbreak this winter and next spring. So we have to develop emergency vaccines as soon as possible.*"

I strongly believe that whether it be now, or sometime in the future, scientists, technocrats, physicians, mediums and healers will work together to perfect the science of whole healing. I also believe that the work of mediums should be recognised as a branch of physics because we study and work with energy structures and the Universal Mind. Academic training is often not enough. There is so much more that is not yet known. By removing prejudices, it is possible to utilise information that can bring an end to the stalemate position that has caused so much suffering for so long. This would be an immense advantage to future generations.

If you are interested, I would be willing to come to Hong Kong or China and bring samples of my cure and vaccine for testing.

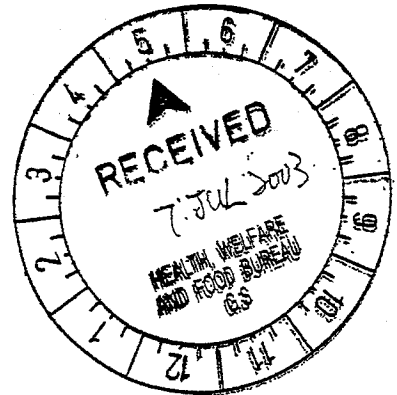

Yours sincerely,

HELEN MORRIS

CAUSE OF SARS:

The corona virus was spread by a human to one particular species of bird where it was mutated by a pre-existing avian virus. This occurred approximately 15 months ago. It transferred to Civer cats, pigs, domestic cats, raccoon dogs, snakes and probably any other animal (or bird) in China that preys upon birds or may be exposed to their droppings.

The first human to be infected with the new strain of virus was infected by a dog in Guangdong Province. This person then travelled to Beijing and was responsible (unknowingly) for the spread of the virus there.

The mutated virus is unlikely to kill birds, but with respect to animals the effect is similar to that of humans - some will die, but the majority will not (there are underlying reasons for this). In birds and cats the virus would not be identified as they are carriers of the mutated avian virus, that when transferred to other animals and humans becomes SARS.

The virus can spread through contaminated air, saliva (via coughing, sneezing, spitting, kissing) urine and faeces. Outside its host, the virus can live in ideal conditions for up to 12 hours, but most would not live outside the host for more than 2 hours.

Currently I believe that the number of affected birds would be approx. 4,000 - affecting 3 different species. Infected birds are now present in 7 countries other than China and some animals have become infected in 6 of those countries. In the long term, I believe that domestic cats will pose the biggest contaminating source of SARS for humans

Initially, persons infected in countries other than China were infected via humans, however, in 3 countries outside of China, persons have become infected via animals. There are no infected animals or birds in Canada and the threat of SARS there will only come from infected persons entering Canada.

CURE:

I have formulated homoeopathic remedies which I believe can provide the safest cure and vaccine for this virus.

From its earliest days, homoeopathy has been able to treat epidemic diseases with a substantial rate of success and documented statistics attest to this fact. It was these successes that placed the practice of Homoeopathy so firmly in the consciousness of people world wide.

However, as there have been no confirmed cases of SARS in Australia, I have no means by which to test these remedies, but if necessary, I am willing to offer myself as a human 'guinea pig' to test the effectiveness of the vaccine against the SARS virus.
